NEC

The ingenious LT projector

LT20

Smallest measurements – greatest performance.

- ▶ Hardly larger than a DIN A5 sheet of paper
- ▶ Only weighs in at 1.0 kilo
- ▶ Slinky new design
- ▶ Even more brilliance: 1,500 ANSI Lumens
- ▶ XGA resolution for the clearest details ever
- ▶ Impressive contrast: 2,100:1
- ▶ Digital Keystone Correction
- ▶ Convenient remote control

The compact professional with impressive strengths.

Small, but exceptionally proficient – that was our goal as we designed the LT20. You'll be fascinated with this projector's minimalistic format, light weight, enormous performance and astonishing brilliance. All systems are go with the LT20.

Starting with its predecessor, NEC began developing a line of projectors which set new standards. Our new DLP™ projector, the LT20, takes these developments a big step further. Not only is it perfectly suited for presenting on-the-go, its design is so advanced that it will put your presentations in the limelight right from the beginning.

▶ Convenient and light as a feather.

Fits in your briefcase – or even in your jacket or coat: at dimensions of 20 x 15 x 5.6 cm (W x D x H), the LT20 isn't much larger and thicker than a paperback. And at only 1.0 kg, you'll hardly even notice it. Try finding another projector that can match this.

▶ Elegant design to support your great performance.

The new NEC LT20 is attractive, elegant and sports finely curved lines. Its soft, flowing contours and compact appearance will draw your audience's spontaneous attention. And after you turn it on, they'll be even more enthused.

▶ Lights on for enormous brilliance!

Once you turn it on, the LT20 can't wait to show off. Its brilliant 1,500 ANSI Lumens light up your presentation surface. Its 1,024 x 768 (XGA) resolution corresponds to standard notebook resolution, and with its high contrast ratio of 2,100:1, it will always support you to your best advantage.

▶ When it comes to image format – the LT20 is the best.

Even though it fits into any briefcase, as soon as it comes to image format, the LT20 is your best friend. If you place it one meter away from your projection surface, it displays images with a 63 cm diagonal. But when you place it at its maximum of 10.0 m, the image diagonal is an incredible 625 cm!

Established technology, proven concept, comfortable handling, the functionality you need combined with convincing convenience: after you own an LT20, you won't know how you got along without it, e.g. for those vital business presentations.

▶ **Precise pictures every time with digital Keystone Correction.**

Your LT20 is just as flexible as you are: as soon as you change presentation environments, the digital Keystone Correction function adjusts your LT20 to the new situation as well – at the touch of a

button. After all, you wouldn't want to show anything but perfect, right-angled images.

And if you'd like to make even more impressive presentations, just close in on image details with the continuously adjustable magnification function or use the freeze and mute functions.

▶ **Easy to use – right from the start.**

A projector you depend on wherever you go must be especially convenient and uncomplicated. The LT20 makes it easy. Thanks to Plug&Play, an intuitive menu and effortless functionality, it will prove to be your best companion.

▶ **Handy remote control included.**

What's true for the LT20 is just as true for its remote control: it's 'mini' in format but 'maxi' in performance. All controls and function settings are in your hand. A gentle touch of the finger is all you need.

▶ **A 11-language menu lets it travel the globe.**

Whether you have a major contract on the other side of the world – or any other international activities, your LT20's on-screen menu is available in 11 languages, making it a true polyglot that can be used as needed in numerous countries, e.g. in multinationals.

Major in format – down to all facts and technical details.

Technical Specifications

Minimal in size and weight, maximal in performance – the LT20 would be happy to escort you wherever you go. It will help you make excellent presentations and draw enthusiastic applause from your audiences. Would you like to get to know the LT20? It's waiting for you at your dealer's.
